Elementary schools are working hard to implement new reading programs. The textbook publishers have done a wonderful job developing research-based materials to support effective reading instruction. However, implementing these programs can be a daunting task. This packet contains resources aligned to your program that can be used by administrators, coaches, and classroom teachers to assist with this implementation. Inside this packet you will find the following implementation tools:

- 10- or 15-minute walk-through observation forms to help administrators and coaches quickly gauge instructional needs. These forms may also be used by classroom teachers.
- Specific grade-by-grade observation checklists for more detailed classroom observation.
- Assessment and Pacing Guides to be used by administrators, coaches, and teachers to develop a school assessment plan using the program assessment resources and to lay out a pacing calendar to align instruction and testing.
- A small-group instruction planner to be used by all staff to assist in effective program implementation.
- Sample 90-minute reading block schedules to help you plan your instructional organization and time.

We hope you will find these resources useful as you implement your new reading program.

In addition to these resources CORE provides site implementation to assist you to effectively use your program. We provide classroom demonstration lessons, observation and feedback, and grade-by-grade work sessions to ensure teachers develop program expertise. In addition, CORE offers a Leader Institute and Coach Institute for principals and coaches to support full implementation of an effective reading program.
