### **Maximizing Virtual Learning for Students with Dyslexia through Appropriate Use of Accommodations**

In a recent webinar sponsored by the International Dyslexia Association Oregon Branch, students shared their experiences with online instruction and what accommodations work best for them. After talking with these students further, we compiled their recommendations as well as resources to help you better support students with dyslexia when they are participating in remote learning.

## **Assisting Students with Dyslexia in Overcoming Challenges with Math**

It should come as no surprise that students with dyslexia often struggle in particular areas when learning mathematics. There are many techniques that can help students with dyslexia overcome their challenges with less pain and with greater success.

### **Leveraging Strong Core Curriculum and MTSS to Support Students with Dyslexia**

When addressing the needs of students with dyslexia or word reading difficulties, a brief, valid, and reliable screener, administered multiple times per year to all students, starting in kindergarten, can help educators understand who is at risk for poor reading outcomes and whether the core ELA curriculum is meeting the needs of the majority of students. To select valid and reliable screeners, high-quality curriculum, and intervention materials and then implement those may require the support of external experts.
