

# Building Momentum for Literacy Across Minnesota and the Midwest

CORE's Impact:  
Proven Results. Growing Momentum.

CORE has spent **three decades** helping districts move from belief to practice — and in Minnesota, that work reached new scale and visibility. In partnership with district leaders and the Department of Education, CORE led one of the most comprehensive literacy initiatives in the country, preparing thousands of educators to deliver instruction grounded in the science of reading and language

## Impact at a Glance:

**Most teachers trained statewide** under the Minnesota READ Act — more than any other provider

**Thousands of educators and leaders** reached across Brainerd, Bloomington, Lakeville, Northfield, and more

**99% completion rates** in large districts — demonstrating relevance and commitment

**Visible shifts in practice:** stronger foundational reading, confident instruction for Multilingual Learners, and shared language across teams

**State-level partnership** with the Minnesota Department of Education to align professional learning and implementation

# CORE Learning's Impact

## Voices from the Field:

*“This changed how I teach. I was wandering around phonics before, but now I have direction.”*

— 2nd Grade Teacher, Brainerd Public Schools

*“It’s bringing our whole system together — everyone’s finally speaking the same language.”*

— District Leader, Bloomington Public Schools

---

## Proven Model. Ready to Scale.

Minnesota’s success shows what happens when professional learning becomes real practice. CORE’s model builds shared knowledge, teacher confidence, and systemwide capacity that lasts long after the training ends.

**Let’s build on this momentum.**
